Custom wall prints made easy

\$82
per sqm

CREATIVE

Clickmedia is now offering a ground breaking innovation in photo walls; a new system that will challenge your thinking on how you can decorate a wall in your home, office or shop.

QUALITY

Using our large format photo quality printers, we can turn your photos or graphics into easy to apply wallpaper turning that dull wall into a vibrant image, as big as you like.

DIY

Our amazing fabric wallpaper has been manufactured to make it DIY easy. The material is made from a special fabric which has a textured feel and like all fabrics it breathes and that means bubbles will no longer be a problem, just smooth them out with your hand. It is also fire retardant and can be used in commercial or any other setting.

SIMPLE

The fabric is durable and can be applied directly on to all smooth clean surfaces; it will not rip or tear and is washable. It can be easily removed if need be with no residue left, simply lift the panel off the wall and reapply allowing it to relocate while smoothing it back down.

All you need do is supply us with a photo or graphic suitable for enlarging or you can pick one from our extensive image library. Provide accurate measurements height and width and we will do the rest.

Clickmedia makes it easy to create your own custom photo wall!
